

Welcome to the Official FTTF Tent Builder!

For best functionality, use Google Chrome or Microsoft Edge as your browser. Other browsers may not work as expected. Please see below for the instructions and frequently asked questions:

What to Expect

- Start by customizing your tent via our tent builder.
- When finished, submit your tent, and a PDF will be generated and downloaded to your computer.
- Then an email will also be sent over to you and to our team
- From here, a representative will reach out to you within 1-2 business days regarding your tent design. This will entail gathering more information from you, including payment options, tax-exemption, etc.
- At this point, you will wait to hear from our art department for you to approve the custom design that you mocked up that we bring to life. This process does take time, so please be patient.
- After the artwork has been approved, we will proceed with handling payment.
- Now that we have payment handled, your tent will be pushed into production. Expect to receive your tent within 2-3 weeks (starting after artwork approval and payment dealt with).
- Finally, enjoy your tent!

How Everything Works

- You will begin at the front side of the tent then work your way to the back, right, and left sides of the tent.
- When you are finished with the current section, click the Next button to go to the next section. You can always go back to the previous section(s) for later editing using the Prev button.

- After you have completed all sections, a Preview Now button will show, which will generate the preview of your tent. This can take up to a couple of minutes to load depending on how much customization is done.
- With the preview finished, you now have the option to go back and edit more or submit your design.
- If you are ready to submit, please fill out all the contact information and press submit. This will generate a PDF for you and automatically download it to your computer.
- THIS WILL NOT PLACE AN ORDER, JUST SUBMITS A DESIGN! APPROVAL STILL MUST BE DONE BEFORE ORDER IS PLACED!
- On the right side of the screen, you will see a box labeled SELECT OPTIONS, which is where most of your customization takes place. There are five subsections labeled accordingly:

- **Tent Setup Options:**

- Within this menu, you can choose your tent size, frame type, and whether the walls are present.
- This also shows the total price based on your choices and the difference in pricing for each choice.
- For changes to take effect, you must save changes. After changes have been saved, the size will change and your design choices previously made will reapply but may need some readjusting.

- **Current Section:**

- Tell you what part of the tent you are customizing.
- A button will appear for copying from opposite side are on the following sections: Back Peak, Back Valance, Left Peak, Left Valance, Left Wall.

- **Choose Color:**

- Click any of the colored dots to change the color of the section or pick a custom color by clicking on the rainbow dot.

- **Add Text:**

- Type whatever message you would like on this section of the tent.
- You then must choose the Font.
- You then can change the color of the text and color of the outline of the text to any color just like for choosing the tent color. If you do not want any outline color, click clear.
- Once you click on the text on the tent, you can move the text around by dragging it, and you can resize it by dragging the bottom-right corner of the text box.
- Only text that is within the current section will show.

- **Add Your Art:**

- Upload your art here. The file's format must be one of the following: .jpg, .jpeg, .png, .svg.
- Art will appear on the right-hand side to show you which art is in the current section. There is also a dropdown for additional base sizing options.
- You can upload as many as you would like; however, the more you upload, the longer it may take for you to get the final art approval.
- You may be asked to send your artwork to our art department after the design has been submitted, so please keep your files until after the art approval has been finished.
- Just like for text, you will be able to move around and resize the art the same way.
- You can also drag and reorder the images in the Art Preview section to be able to edit how images are layered. The images that are first in the preview sit above the images that are after it.

- **Notes to Artist:**

- This is the place to put any notes, changes, questions, or issues that you want addressed with your design for this section. (Ex. Size to fit the text for the front valance to the height of the section.)
- Every section has this, so please write about the current section only.

- It is limited to 200 characters only but keep it clear and specific about what you would like done.

Helpful Tips

- Press the delete key after selecting an item on the tent to delete it.
- There are three icons to the right of the displayed tent:
 - **Toggle Snap Grid:** Turns on/off the horizontal and vertical center lines for snapping.
 - **Horizontal Center:** For items that have been selected (box showing around them), this will center the item to the horizontal center.
 - **Vertical Center:** For items that have been selected (box showing around them), this will center the item to the vertical center.
